

2015 Colorado Wheat Field Days

The field days will highlight new hard red and hard white winter wheat varieties developed by CSU and other public and private breeding programs in the Great Plains region. Attention will also be given to variety selection, special areas of emphasis in wheat breeding at CSU, and progress and plans with CWAC and CWRP funding for CSU wheat research.

Each plot tour will last about an hour and all field day locations will include refreshments or a meal.

Wednesday, June 10
