  - All others under 3%

2020 Winter Wheat Condition
March 16: 10% Very Poor 11% Poor 33% Fair 43% Good 3% Excellent
March 22: 7% Very Poor 12% Poor 26% Fair 46% Good 9% Excellent

Regional drought map
Colorado as of March 24th
23.8% Abnormally dry
42.7% Moderate drought
3.2% Severe drought
0% Extreme drought
0% Exceptional drought

World Agricultural Supply and Demand Estimates
As of March 10, 2020 (next report April 9)
- Global outlook for wheat this month is for higher production, increased consumption and exports, and lower ending stocks.
- World exports are increased by 0.8 million tons to 183.6 million as higher exports by Russia and Argentina more than offset reductions for Canada and Australia.
- Output is raised on higher production forecasts for India and Argentina more than offsetting reductions for Turkey and Australia.
- Global ending stocks are projected lower this month but remain record large for the 2019/20 crop year at 287.1 million tons with China comprising 52 percent of the total.
