Average			19.0	60	16	1	16.1

†This trial could not be interpreted due to plot variation caused by very dry growing conditions. Average yields reported above are only trends and averages should not be considered different from each other. Yield results should not be used by farmers for selecting superior varieties for planting.

Site Information

Collaborator: Homestead Farms

Harvest date: July 13, 2022

Planting date: September 15, 2021

Soil Type: Weld silt loam

GPS Coordinates: 39.35086, -103.50872

Trial Comments: Planted 2" deep into good moisture. Fall emergence was average with little growth. In mid-April there was moisture 3" from the soil surface. In mid-May the trial looked very drought stressed. Radar estimates showed the trial received 8.4" of precipitation (including 1.6" rainfall event on July 6th) and 3494 growing degree-days (GDD) (base 32°F) from Jan. 1st through July 13th, which was 1.6" below and 118 GDD above the 10-year average, respectively.
